We're putting up **cat-interiors.de** **Cat-Interiors** because they're good and also because they might give someone a good idea for a DIY project. Check out these designs below.

Using felt, wicker and leather, the designers, **Christel & Otto Meyer**, have crafted a distinctive line of pet beds and perches for both "action or rest." With a little prying, we're sure that they'll be selling in the States soon.
